Each SST Power Speaker contains 4 12" Altec Lansing 417B Musical Instrument Loud Speakers in AMPEG'S reflex tuned enclosure connected to a 120 watt power amplifier. A level control is provided for equal volume from each power speaker.

TOTAL POWER OUTPUT:

240 watts R.M.S. (over 600 watts peak music power.)
42 Silicon transistors and 10 Silicon diodes in exclusive AMPEG Solid State circuits.

DIMENSIONS AND WEIGHTS:

Control Head:

25½" wide, 10" deep, 6" tall. Shipping weight 30 pounds.

Power Speakers

Enclosures:

29" wide, 14" deep, 42" tall. Shipping weight: (2) 270 pounds.

All interconnecting cables provided.

Covers Optional

The AMPEG SST was designed to provide the professional musician with the amplification system required for concert performances. The SST control head provides unlimited sound flexibility with selective midrange cut and boost plus low frequency control with 3-way Ultra Lo's. The power speakers (2) each with 120 watts of Solid State Power (Total — 240 watts) and 4 Altec Lansing 12" speakers provide crisp clean sound at high power levels with maximum dependability.

Additional SST Power Speakers may be added for increased sound levels.
